

WATERSHED ASSETS AT RISK
RANKINGS BY 450 ACRE CELL

ASSET RANK

- Moderate rank
- High rank

ASSET RANKING METHODOLOGY

The Fire Plan process involves mapping various Assets at Risk, and applying a methodology to rank each Asset across the landscape based on areas of highest expected loss in a large damaging fire event. Weights can then be assigned to individual Assets in order to derive a weighted total score and rank (Low, Medium, High) considering all Assets.

This map depicts the rankings derived by applying the following weights to watershed Assets:

- Water Supply - 5
- Water storage - 3
- Post-fire erosion - 5
- Visual/recreation (Wild & Scenic rivers) - 5
- Hydroelectric power - 3
